SUMMARY

Full-Stack and React Native Developer with hands-on production experience building cross-platform mobile applications, RESTful APIs, and enterprise web systems. Proficient in React, React Native, TypeScript, Node.js, and MongoDB. Experienced with Agile workflows, CI/CD, performance optimization, and role-based access control. Seeking a fresher Software Developer or Mobile Application Developer role in India.

EDUCATION

Bennett University

Bachelor of Technology, Computer Science and Engineering (Specialization: Artificial Intelligence)

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Machine Learning, Computer Networks, DBMS, Object-Oriented Programming, Software Engineering, Natural Language Processing

Greater Noida, India

Aug 2023 – May 2027

TECHNICAL SKILLS

Mobile Development: React Native, Expo, Expo Router, NativeWind, React Navigation, TanStack React Query, Context API, Cross-Platform Development (iOS and Android)

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, GSAP, Responsive Design, Vite

Backend and Databases: Node.js, Express.js, PHP, REST APIs, Socket.IO, MongoDB, PostgreSQL, MySQL, Prisma ORM, Appwrite

Tools and Practices: Git, GitHub, Figma, Stripe, Clerk Auth, Cloudinary, Vercel, XAMPP, Sentry, Docker, Jest, CI/CD, Agile, Scrum, Unit Testing, Performance Optimization, RBAC

Languages: JavaScript, TypeScript, Python, C++, Java, PHP, SQL

AI and ML: Machine Learning, Deep Learning, NLP, Computer Vision, BERT, NumPy, Pandas

EXPERIENCE

Software Development Intern

Jan 2026 – Jun 2026

Zenith Enterprise Solutions Pvt. Ltd. (MF360) | mf360.in

Remote

- Sole frontend developer for MF360, an AI-powered SaaS platform for Mutual Fund Distributors; built the entire web product from scratch using React, TypeScript, Vite, and Tailwind CSS and led two major redesigns from MVP to production
- Developed responsive landing pages, authentication flows, dashboard components, and animations optimized across mobile, laptop, and large-screen devices; implemented Auth0-based Google authentication
- Automated Mutual Fund NAV data retrieval using Python scripts and Power Query workflows; collaborated directly with founders to ship production-ready features across multiple release phases

Web Development Intern

June 2025

Heavy Vehicles Factory (HVF), Ministry of Defence, Government of India

Chennai, India

- Identified that 100% of leave workflows at India's premier defence manufacturing unit were manual and paper-based; served as sole developer responsible for designing and delivering a full-stack intranet replacement within a fixed training window
- Built HVF e-Leave using React, TypeScript, PHP, and MySQL with role-based access control (RBAC) for Admin and Employee portals, automated business logic for 6+ leave types (CL, EL, HPL, ML, CCL, OD), multi-level approval routing, and real-time status tracking
- Architected normalized relational MySQL schema covering employees, leave balances, approval chains, and audit trails; built responsive Tailwind CSS UI deployed on XAMPP local server with 99%+ uptime during demonstration
- Delivered production-ready system that eliminated all paper-based processing and reduced approval time from days to under 2 hours; authored full technical documentation covering system architecture, API design, and deployment procedures

PROJECTS

Expo Ecommerce – Full-Stack Mobile Shopping App | React Native, Expo, Node.js, MongoDB, Stripe

GitHub

- Built production-ready cross-platform e-commerce app (iOS and Android) with React Native frontend, Express.js and MongoDB REST API backend, admin dashboard, and real-time inventory management across 10+ product categories
- Integrated Stripe PaymentSheet for secure checkout; Clerk auth with Google and Apple SSO; TanStack React Query for server-state caching; NativeWind and Expo Router for UI and navigation; Sentry for crash monitoring; Inngest for async background jobs

QuickShow – Movie Theater Booking Platform | React, Node.js, Express.js, MongoDB, Stripe, Clerk

Live | GitHub

- Built full-stack cinema booking platform with real-time seat selection, Stripe payments, and Nodemailer email confirmations; achieved sub-2-second load times via code splitting and lazy loading; admin dashboard managing 20+ movies and 100+ showtimes
- Improved API response times by 45% via MongoDB query optimization and indexing; integrated Clerk auth, Cloudinary media storage, and Inngest workflow automation; deployed on Vercel with CI/CD pipeline

HVF e-Leave Portal – Enterprise React Edition | React 19, TypeScript, Tailwind CSS, Node.js, Vite

Live

- Built standalone React 19 and TypeScript SPA for defence-sector deployment with multi-tier approval workflows, real-time leave tracking, and RBAC (Admin, Manager, Employee); achieved 100% elimination of paper-based processing
- Engineered RESTful Node.js APIs with full CRUD, input validation, and error handling for 6+ leave types; fully responsive Tailwind CSS UI with cross-device compatibility; production-ready with end-to-end TypeScript type safety and unit-tested API layer
